ise-boilerplate - Admin Guide

Complete administration guide for managing this Edge Delivery Services project. All values in this guide were retrieved from the Adobe Config Service API for the `aemdemos` organization.

Project Summary

Property	Value
Organization	aemdemos
Site	ise-boilerplate
Setup Type	Standard (single GitHub repo within a shared demo organization)
Code Repository	aemdemos/ise-boilerplate (GitHub)
Content Source	https://content.da.live/aemdemos/ise-boilerplate/ (Document Authoring)
Auth Requirement	<code>requireAuth: auto</code> (preview/live require Adobe sign-in when accessed via the admin tooling)

Note: The `aemdemos` organization is a large shared demonstration tenant (hundreds of sites). This guide is scoped specifically to the `ise-boilerplate` site. Always include the exact site name in every Admin API call to avoid affecting other sites in the org.

Quick Reference

URLs

Purpose	URL
Login	https://admin.hlx.page/login/aemdemos/ise-boilerplate
Site Config	https://admin.hlx.page/config/aemdemos/sites/ise-boilerplate.json
Org Sites List	https://admin.hlx.page/config/aemdemos/sites.json
Preview	https://main-ise-boilerplate-aemdemos.aem.page/
Live	https://main-ise-boilerplate-aemdemos.aem.live/
Content (DA)	https://content.da.live/aemdemos/ise-boilerplate/
Code Repo	https://github.com/aemdemos/ise-boilerplate

Site Details

Site	Content Source (DA)	Preview	Live
ise-boilerplate	https://content.da.live/aemdemos/ise-boilerplate/	https://main-ise-boilerplate-aemdemos.aem.page/	https://main-ise-boilerplate-aemdemos.aem.live/

Access Control

The site's access roles (from the Config Service `access.admin.role` configuration) are:

Role	Members	Capability
Admin	che1ms@adobe.com, dfink@adobe.com	Full administration, including config and access management
Author	*@adobe.com (any Adobe ID)	Edit and preview content
Publish	*@adobe.com (any Adobe ID)	Publish content to live
Config	*@adobe.com (any Adobe ID)	Modify site configuration

`requireAuth` is set to `auto`, meaning authentication is enforced automatically where applicable.

Important: Because Author/Publish/Config are open to any `*@adobe.com` identity, only the two named admins should perform sensitive operations such as access changes or configuration edits.

Authentication

Login

1. Open: <https://admin.hlx.page/login/aemdemos/ise-boilerplate>
2. Sign in with your Adobe ID
3. Copy the auth token for API operations and export it:

```
export AUTH_TOKEN="<your-token>"
```

Logout

```
curl -X POST \  
  -H "x-auth-token: $AUTH_TOKEN" \  
  "https://admin.hlx.page/logout/aemdemos/ise-boilerplate/main"
```

User Management

View Current Access

```
curl -H "x-auth-token: $AUTH_TOKEN" \
  "https://admin.hlx.page/config/aemdemos/sites/ise-boilerplate/access.json"
```

Add a User

Role	Command
Admin	POST /config/aemdemos/sites/ise-boilerplate/access/admin.json with body {"users": ["email"]}
Author	POST /config/aemdemos/sites/ise-boilerplate/access/author.json with body {"users": ["email"]}

Example:

```
curl -X POST \
  -H "x-auth-token: $AUTH_TOKEN" \
  -H "Content-Type: application/json" \
  -d '{"users": ["newadmin@adobe.com"]}' \
  "https://admin.hlx.page/config/aemdemos/sites/ise-boilerplate/access/admin.json"
```

Remove a User

```
curl -X DELETE \
  -H "x-auth-token: $AUTH_TOKEN" \
  "https://admin.hlx.page/config/aemdemos/sites/ise-boilerplate/access/admin/{email}.json"
```

Content Operations

Preview

Operation	Endpoint
Single page	POST /preview/aemdemos/ise-boilerplate/main/{path}
Bulk preview	POST /preview/aemdemos/ise-boilerplate/main/*

```
curl -X POST \
  -H "x-auth-token: $AUTH_TOKEN" \
  "https://admin.hlx.page/preview/aemdemos/ise-boilerplate/main/index"
```

Publish

Operation	Endpoint
Single page	POST /live/aemdemos/ise-boilerplate/main/{path}

Operation	Endpoint
Bulk publish	POST /live/aemdemos/ise-boilerplate/main/*
Unpublish	DELETE /live/aemdemos/ise-boilerplate/main/{path}

```
curl -X POST \
  -H "x-auth-token: $AUTH_TOKEN" \
  "https://admin.hlx.page/live/aemdemos/ise-boilerplate/main/index"
```

Cache

Operation	Endpoint
Purge path	POST /cache/aemdemos/ise-boilerplate/main/{path}
Purge all	POST /cache/aemdemos/ise-boilerplate/main/*

Code Operations

The code lives in the GitHub repository `aemdemos/ise-boilerplate`. Code is normally synced automatically via the AEM Code Sync GitHub App on push to `main`. To trigger a manual sync:

```
curl -X POST \
  -H "x-auth-token: $AUTH_TOKEN" \
  "https://admin.hlx.page/code/aemdemos/ise-boilerplate/main"
```

Sidekick / Authoring Tools

This site has a custom Sidekick plugin configured:

Plugin ID	Title	Environments	Event
experience-workspace	Canvas	dev, preview, live	experience-workspace

Authors use the Sidekick “Canvas” plugin (Experience Workspace) when working in the supported environments. Content is authored in Document Authoring (DA) at <https://content.da.live/aemdemos/ise-boilerplate/>.

Common Tasks

Task	Steps
Add a new admin	POST /config/aemdemos/sites/ise-boilerplate/access/admin.json with {"users":["email"]}
Republish the whole site	POST /preview/aemdemos/ise-boilerplate/main/* then POST /live/aemdemos/ise-boilerplate/main/*
Clear all cache	POST /cache/aemdemos/ise-boilerplate/main/*
Deploy code changes	Push to main (auto-sync), or POST /code/aemdemos/ise-boilerplate/main

Task	Steps
Check current access	GET /config/aemdemos/sites/ise-boilerplate/access.json

Troubleshooting

Issue	Solution
401 Unauthorized	Token expired — log in again at the login URL
403 Forbidden	Insufficient permissions — confirm you are in the admin role
404 Not Found	Check org/site/path spelling; confirm the site name is ise-boilerplate
429 Rate Limited	Wait and retry
Cache not clearing	Retry the purge with forceUpdate: true
Code not syncing	Trigger a manual sync: POST /code/aemdemos/ise-boilerplate/main
Wrong site affected	Verify the exact site name in the path — the org has many sites
